SUBJECT: Procurement Requirements for Read-out Equipment for Systems One, Three, Four and Five

50X1

cc: Clark

50X1

1. Attached is the "Cost for Racks" paper which I promised you yesterday. The paper, I believe, takes care of the fact that the D racks have been eliminated and takes account of the Air Force need for two additional L racks.

2. As I promised, I will move forward now as rapidly as I can to sound out Mr. Bissell and General Cabell on the finances in order that you may make your final approach to Colonel Harrington with confidence that the figures you present are sound.

3. I have not removed figures bearing upon our needs in order that you might have the complete story. However, I would suggest, as we discussed yesterday, that such information need not be passed on to other Air Force components except in indicating that which another party will purchase on behalf of the Air Force.
